Subject index

Adsorption
Hydrogen and anion adsorption at platinum single crystal electrodes in phosphate solutions over a wide range of pH (Ye et al.) 299
Aldehydes
Electro-organic reactions on organic electrodes. Electrolysis using composite-plated electrodes: Electroreduction of aldehydes in hydration/dehydration equilibria (Kunugi et al.) 325
Alkaline solution
Electrocatalytic properties of amorphous nickel boride electrodes for hydrogen evolution reaction in alkaline solution (Los, Lasia) 115
An in-situ IR spectroscopic study of the anodic oxide film on cobalt in alkaline solutions (Bewick et al.) 165
Enhanced oxygen evolution on an electrodeposited and activated rhodium electrode in alkaline solution (Vuković, Čukman) 195
Alkyl vicinal dibromides
Electrocatalysis in organized assemblies. Debromination of alkyl vicinal dibromides with neutral metal phthalocyanines in a bicontinuous microemulsion (Iwunze et al.) 353
Alloys
An electrochemical and X-ray photoelectron spectroscopic study into the mechanism of Ti + W alloy etching in H_2O_2 solutions (Van den Meerakker et al.) 205
Anodic stripping voltammetry
Polarography and anodic stripping voltammetry of metal–polycarboxylate complexes: phenomenological relationship between limiting currents and hydrodynamic mass transport (Díaz-Cruz et al.) 33
Bicontinuous microemulsion
Electrocatalysis in organized assemblies. Debromination of alkyl vicinal dibromides with neutral metal phthalocyanines in a bicontinuous microemulsion (Iwunze et al.) 353
Bridging ligand
Dynamical solvent effect on the reduction kinetics of cobalt(III) anchored to a mercury electrode via a bridging ligand in water + DMF mixtures (Jaworski et al.) 371
Cadmium cations
Splitting of the DPP signal yielded by a single-step charge- transfer process with a very low transfer coefficient. Application to the determination of kinetic parameters for the reduction of Cd^{2+} and Zn^{2+} in dimethylsulphoxide (Muñoz et al.) 153
Cadmium complexes
Polarography and anodic stripping voltammetry of metal–polycarboxylate complexes: phenomenological relationship between limiting currents and hydrodynamic mass transport (Díaz-Cruz et al.) 33
Cadmium telluride
An investigation into the effect of ionic species on the deposition of tellurium and the formation of cadmium telluride (Dennison, Webster) 287
Cellulose acetate films
Electrodeposition of platinum and palladium particles into base-hydrolyzed cellulose acetate films. Electrocatalytic/permselective surface microstructures (Wang et al.) 65
Charge-transfer process
Splitting of the DPP signal yielded by a single-step charge- transfer process with a very low transfer coefficient. Application to

the determination of kinetic parameters for the reduction of Cd^{2+} and Zn^{2+} in dimethylsulphoxide (Muñoz et al.) 153

Cobalt electrode

An in-situ IR spectroscopic study of the anodic oxide film on cobalt in alkaline solutions (Bewick et al.) 165

Cobalt(III)

Dynamical solvent effect on the reduction kinetics of cobalt(III) anchored to a mercury electrode via a bridging ligand in water+DMF mixtures (Jaworski et al.) 371

Concentration

The influence of hydrofluoric acid concentration on electroless copper deposition onto silicon (Nagahara et al.) 363

Copper deposition

The influence of hydrofluoric acid concentration on electroless copper deposition onto silicon (Nagahara et al.) 363

Cyclic voltammetry

Application of cyclic voltammograms under mixed spherical/semi-infinite linear diffusion at microdisk electrodes for measurement of fast electrode kinetics (Lavagnini et al.) 1

Cyclic voltammetry of a quasi-reversible system with a gaussian distribution of heterogeneous rate constants (Cassidy et al.) 313

Dehalogenation

Electrocatalysis in organized assemblies. Debromination of alkyl vicinal dibromides with neutral metal phthalocyanines in a bicontinuous microemulsion (Iwunze et al.) 353

Digital simulations

Application of cyclic voltammograms under mixed spherical/semi-infinite linear diffusion at microdisk electrodes for measurement of fast electrode kinetics (Lavagnini et al.) 1

Dimethylsulphoxide

Splitting of the DPP signal yielded by a single-step charge- transfer process with a very low transfer coefficient. Application to the determination of kinetic parameters for the reduction of Cd^{2+} and Zn^{2+} in dimethylsulphoxide (Muñoz et al.) 153

Electrocatalysis

Efficient electrocatalyst assemblies for proton and oxygen reduction: the electrosynthesis and characterization of polypyrrole films containing nanodispersed platinum particles (Bose, Rajeshwar) 235

Electrocatalysis in organized assemblies. Debromination of alkyl vicinal dibromides with neutral metal phthalocyanines in a bicontinuous microemulsion (Iwunze et al.) 353

Electrochemical nucleation

A galvanostatic study of electrochemical nucleation (Milchev, Montenegro) 93

Electrochromic behaviour

Synthesis and electrochemical analysis of *N*-substituted pyrrole compounds (Kondo et al.) 143

Electrode kinetics

Electrode kinetics of oxygen reduction on gold in molten carbonate (Lu, Selman) 257

Electro-organic reactions

Electro-organic reactions on organic electrodes. Electrolysis using composite-plated electrodes: Electroreduction of aldehydes in hydration/dehydration equilibria (Kunugi et al.) 325

Fast electrode kinetics

Application of cyclic voltammograms under mixed spherical/semi-infinite linear diffusion at microdisk electrodes for measurement of fast electrode kinetics (Lavagnini et al.) 1

Ferrocene

Phase-transition dependent electron transfer of electrodes coated with multi-bilayer films of a ferrocene-carrying synthetic lipid characterized by cyclic voltammetry and chronocoulometry (Nakashima et al.) 345

Folic acid

Electrochemical reduction of folic acid reconsidered (Gurira et al.) 217

Frumkin correction

The use of the Frumkin correction in the kinetics of the ion transfer across the interface between two immiscible electrolyte solutions. A comment on the paper by Girault et al. (Samec, Mareček) 319

Galvanostatic conditions

A galvanostatic study of electrochemical nucleation (Milchev, Montenegro) 93

Glassy carbon electrodes

Influence of the supporting electrolyte and the pH on the electrooxidative activation of

glassy carbon electrodes (Jürgen, Steckhan) 177
Gold
Electrode kinetics of oxygen reduction on gold in molten carbonate (Lu, Selman) 257
Gold electrode
Use of the laser-desorption technique for the preparation of a mixed-thiol monolayer on a gold electrode (Takehara et al.) 339

Heterogeneous rate constants
Cyclic voltammetry of a quasi-reversible system with a gaussian distribution of heterogeneous rate constants (Cassidy et al.) 313
Horse heart myoglobin
Direct electron transfer of horse heart myoglobin at an indium oxide electrode (Taniguchi et al.) 331
Hydrofluoric acid
The influence of hydrofluoric acid concentration on electroless copper deposition onto silicon (Nagahara et al.) 363
Hydrogen
Electrocatalytic properties of amorphous nickel boride electrodes for hydrogen evolution reaction in alkaline solution (Los, Lasia) 115
Hydrogen and anion adsorption at platinum single crystal electrodes in phosphate solutions over a wide range of pH (Ye et al.) 299
Hydrogen peroxide solutions
An electrochemical and X-ray photoelectron spectroscopic study into the mechanism of Ti + W alloy etching in H_2O_2 solutions (Van den Meerakker et al.) 205

Immiscible electrolyte solutions
The use of the Frumkin correction in the kinetics of the ion transfer across the interface between two immiscible electrolyte solutions. A comment on the paper by Girault et al. (Samec, Mareček) 319
Indium oxide electrode
Direct electron transfer of horse heart myoglobin at an indium oxide electrode (Taniguchi et al.) 331
Ionic species
An investigation into the effect of ionic species on the deposition of tellurium and the formation of cadmium telluride (Dennison, Webster) 287
Ion transfer
The use of the Frumkin correction in the kinetics of the ion transfer across the interface between two immiscible electrolyte solutions. A comment on the paper by Girault et al. (Samec, Mareček) 319

Kinetics
The use of the Frumkin correction in the kinetics of the ion transfer across the interface between two immiscible electrolyte solutions. A comment on the paper by Girault et al. (Samec, Mareček) 319

Laser desorption
Use of the laser-desorption technique for the preparation of a mixed-thiol monolayer on a gold electrode (Takehara et al.) 339
Lithium electrodes
XPS analysis of a lithium surface immersed in propylene carbonate solution containing various salts (Kanamura et al.) 127
Long-time transient
The long-time transient of two- and three-dimensional diffusion in microelectrode chronoamperometry (Phillips) 11

Mercury/electrolyte interface
Some aspects of the kinetics of formation of condensed 5-methyluracil films at the mercury/electrolyte interface (Wandlowski) 77
Metal phthalocyanines
Electrocatalysis in organized assemblies. Debromination of alkyl vicinal dibromides with neutral metal phthalocyanines in a bicontinuous microemulsion (Iwunze et al.) 353
Methyluracil films
Some aspects of the kinetics of formation of condensed 5-methyluracil films at the mercury/electrolyte interface (Wandlowski) 77
Microdisk electrodes
Application of cyclic voltammograms under mixed spherical/semi-infinite linear diffusion at microdisk electrodes for measurement of fast electrode kinetics (Lavagnini et al.) 1
Microelectrode
The long-time transient of two- and three-dimensional diffusion in microelectrode chronoamperometry (Phillips) 11

Microstructures
Electrodeposition of platinum and palladium particles into base-hydrolyzed cellulose acetate films. Electrocatalytic/permselective surface microstructures (Wang et al.) 65
Mixed-thiol monolayer
Use of the laser-desorption technique for the preparation of a mixed-thiol monolayer on a gold electrode (Takehara et al.) 339
Molten amides
Electrochemical and photoelectrochemical reduction of oxygen at semiconductor electrodes in molten amides (Sampath, Narayan) 273
Molten carbonate
Electrode kinetics of oxygen reduction on gold in molten carbonate (Lu, Selman) 257
Multi-bilayer films
Phase-transition dependent electron transfer of electrodes coated with multi-bilayer films of a ferrocene-carrying synthetic lipid characterized by cyclic voltammetry and chronocoulometry (Nakashima et al.) 345

Nanodispersed platinum
Efficient electrocatalyst assemblies for proton and oxygen reduction: the electrosynthesis and characterization of polypyrrole films containing nanodispersed platinum particles (Bose, Rajeshwar) 235
Nickel
Studies of electrodeposition of nickel: different nickel(II) and sulphonated additive concentrations (Gómez et al.) 47
On the composition of the passive film on nickel: a surface-enhanced Raman spectroelectrochemical study (Melendres, Pankuch) 103
Nickel boride electrode
Electrocatalytic properties of amorphous nickel boride electrodes for hydrogen evolution reaction in alkaline solution (Los, Lasia) 115

Organic electrodes
Electro-organic reactions on organic electrodes. Electrolysis using composite-plated electrodes: Electroreduction of aldehydes in hydration/dehydration equilibria (Kunugi et al.) 325
Oxidation
Influence of the supporting electrolyte and the pH on the electrooxidative activation of glassy carbon electrodes (Jürgen, Steckhan) 177
Oxide film
An in-situ IR spectroscopic study of the anodic oxide film on cobalt in alkaline solutions (Bewick et al.) 165
Oxygen
Enhanced oxygen evolution on an electrodeposited and activated rhodium electrode in alkaline solution (Vuković, Čukman) 195
Electrode kinetics of oxygen reduction on gold in molten carbonate (Lu, Selman) 257
Electrochemical and photoelectrochemical reduction of oxygen at semiconductor electrodes in molten amides (Sampath, Narayan) 273

Palladium particles
Electrodeposition of platinum and palladium particles into base-hydrolyzed cellulose acetate films. Electrocatalytic/permselective surface microstructures (Wang et al.) 65
Passive film
On the composition of the passive film on nickel: a surface-enhanced Raman spectroelectrochemical study (Melendres, Pankuch) 103
Platinum
Electrodeposition of platinum and palladium particles into base-hydrolyzed cellulose acetate films. Electrocatalytic/permselective surface microstructures (Wang et al.) 65
Hydrogen and anion adsorption at platinum single crystal electrodes in phosphate solutions over a wide range of pH (Ye et al.) 299
Polycarboxylate complexes
Polarography and anodic stripping voltammetry of metal–polycarboxylate complexes: phenomenological relationship between limiting currents and hydrodynamic mass transport (Díaz-Cruz et al.) 33
Polypyrrole films
Efficient electrocatalyst assemblies for proton and oxygen reduction: the electrosynthesis and characterization of polypyrrole films containing nanodispersed platinum particles (Bose, Rajeshwar) 235
Propylene carbonate solution
XPS analysis of a lithium surface immersed in propylene carbonate solution containing various salts (Kanamura et al.) 127

Pyrrole compounds
Synthesis and electrochemical analysis of *N*-substituted pyrrole compounds (Kondo et al.) 143

Reduction
Electrochemical reduction of folic acid reconsidered (Gurira et al.) 217
Rhodium electrode
Enhanced oxygen evolution on an electrodeposited and activated rhodium electrode in alkaline solution (Vuković, Čukman) 195

Semiconductor electrodes
Electrochemical and photoelectrochemical reduction of oxygen at semiconductor electrodes in molten amides (Sampath, Narayan) 273
Silicon
The influence of hydrofluoric acid concentration on electroless copper deposition onto silicon (Nagahara et al.) 363
Solvent effect
Dynamical solvent effect on the reduction kinetics of cobalt(III) anchored to a mercury electrode via a bridging ligand in water + DMF mixtures (Jaworski et al.) 371
Sulphonated additives
Studies of electrodeposition of nickel: different nickel(II) and sulphonated additive concentrations (Gómez et al.) 47
Synthetic lipid
Phase-transition dependent electron transfer of electrodes coated with multi-bilayer films of a ferrocene-carrying synthetic lipid characterized by cyclic voltammetry and chronocoulometry (Nakashima et al.) 345

Tellurium
An investigation into the effect of ionic species on the deposition of tellurium and the formation of cadmium telluride (Dennison, Webster) 287
Titanium
An electrochemical and X-ray photoelectron spectroscopic study into the mechanism of Ti + W alloy etching in H_2O_2 solutions (Van den Meerakker et al.) 205
Tungsten
An electrochemical and X-ray photoelectron spectroscopic study into the mechanism of Ti + W alloy etching in H_2O_2 solutions (Van den Meerakker et al.) 205

Zinc cations
Splitting of the DPP signal yielded by a single-step charge- transfer process with a very low transfer coefficient. Application to the determination of kinetic parameters for the reduction of Cd^{2+} and Zn^{2+} in dimethylsulphoxide (Muñoz et al.) 153
Zinc complexes
Polarography and anodic stripping voltammetry of metal–polycarboxylate complexes: phenomenological relationship between limiting currents and hydrodynamic mass transport (Díaz-Cruz et al.) 33
